

This is not right that the NAB is even thinking about taking this away from us. I drive a truck for a living and it helps with getting around in these place when I am there. I don't know all the local stations that would cover things as traffic. Is it not safer for us and all the others on the road if we just have to push 1 button and get the information we need, also with this service I know for a fact that it has keep me out a lot of Traffic jams. Think about it, if you take it a way from us in the trucks, and those who have them in their cars, it could be you or a family member of yours that needs the help and can't be reached because of traffic. If anything we need more cities covered on the XM Radio.
